

GreYat (Ojies)

Computer Science • University of Benin, Nigeria • Remote

github.com/G-ojies | x.com/Great_ojies | Telegram: @G_Ojies

SUMMARY

Penultimate-year CS student with deep experience in AI tooling, cybersecurity, and Web3 development. Builds and evaluates AI-powered systems, defines quality criteria, and delivers structured assessments. Strong written English (C2), excellent critical thinking, and a track record of high-quality output under competitive conditions.

RELEVANT PROJECTS & EXPERIENCE

GreYat Labs — AI Chat Interface

2025–2026

Built a branded LLM-powered chat app (Next.js + FreeModel API, deployed on Vercel). Evaluated model responses for quality, tone, and usability; iterated on prompts based on output assessment.

SolanaAudit AI — Token Security Scanner

2025

Designed and shipped an AI-powered scanner for Solana token security analysis. Created evaluation rubrics for AI-generated security reports; assessed outputs across clarity, accuracy, and actionability dimensions.

VaultMind Bounty — AI Audit Submission

2025

Submitted btc-margin-vault to VaultMind Scan Insights bounty. Reviewed and interpreted AI-generated audit output (scored 92/100); identified gaps, documented findings, and produced structured evaluation writeup.

Superteam Nigeria — Bounties & Evaluations

2024–2026

Active contributor to competitive bounty ecosystem requiring consistent, high-accuracy output. Work regularly judged against scoring criteria; developed strong instinct for quality signals in ambiguous evaluation scenarios.

SKILLS

AI output evaluation • LLM prompting & assessment • Technical writing (English C2) • Python • Rust • JavaScript • Cybersecurity & OSINT • Annotation & QA workflows • Solana / Web3 development • React • Next.js • Critical thinking & editorial judgment

EDUCATION

B.Sc. Computer Science (in progress)

Penultimate year

University of Benin, Nigeria
